

The Roadmap

Where Team Thrive is today, what's coming next,
and what we're building for your athletes.

Every team. One place.

WHAT TEAM THRIVE IS

One platform. Three jobs.

Manage

Rosters, schedules, events, attendance and payments — the work that has to get done, in one place instead of five.

Connect

Coaches, parents and athletes on the same page. Team messaging with read receipts, so "I told them" and "they know" finally mean the same thing.

Recruit

A verified athletic record that builds over the years an athlete spends with you — and follows them when they move on.

| The first two make your week easier. The third is what makes families stay.

THE PLAN

Now. Next. Beyond.

PHASE 1 · LIVE

Run your club

Teams, rosters, scheduling, messaging, payments and athlete profiles — available today.

PHASE 2 · NEXT

Built for clubs

Multi-team club tools, easier invites, athlete access at 13+, and a refreshed design.

PHASE 3 · BUILDING

The athlete journey

A lifelong record, coach and parent notes, and AI video feedback.

Phase 3 is in design now — about 8 to 10 weeks of build once it starts.

PHASE 1 · LIVE TODAY

Everything your club runs on, **in one app**

- ✓ Teams, rosters and athlete profiles
- ✓ Team messaging with read receipts
- ✓ Import athletes from another team
- ✓ Assistant coaches, with their own access
- ✓ Practices, meets and team events
- ✓ Payments and dues, collected in-app
- ✓ One invite link for parents to join
- ✓ Free to download, on iPhone and Android

Payments run through Stripe — you connect your club's account once, and money goes straight to you.

PHASE 2 · COMING NEXT

Built for clubs, not just **single teams**

- ➔ A club layer above your teams
- ➔ Invite several teams to one event
- ➔ Parents can sign up before you invite them
- ➔ A responsible-parent role to help the coach
- ➔ Move athletes between your teams
- ➔ One-tap invite links — no adding parents by hand
- ➔ Athletes 13 and over get their own access
- ➔ Multi-sport athlete profiles and a new design

The part nobody else is **building**

Every club has admin software. What no one has is a record of the athlete — the ten years between starting at seven and leaving at seventeen. Phase 3 builds that layer.

Athlete Journey

Every team, position, season and milestone — one continuous record that belongs to the athlete, not the club.

Notes & Journal

Coach, parent and athlete notes on a profile, each with its own sharing rules.

AI Video

Upload a short clip, get coaching feedback back, and keep it on the athlete's profile.

Notes and Journal comes first, then Journey, then AI Video.

The same history, seen **three ways**

COACH

Your team's record

Open any athlete on your team and see their tenure, join date, jersey number, and a season-by-season record — position, attendance, games, trainings and days out injured. You see your own team only.

PARENT

The whole story

Open your child's profile and see every team they've been on — current and past — then open any team for the season-by-season detail. Parents see the complete record.

ATHLETE · 13+

Their own history

Athletes see their own record across every team they've been part of, with the same detail per team, plus their calendar and settings.

The record doesn't end when an athlete leaves your program — it goes with them. That's the point.

Notes, with clear rules

COACH

Write and share

You always see your own notes, and you see athlete or parent notes when they've been shared with your team. You can edit and delete your own.

PARENT

Nothing hidden

Parents see everything on their child's profile — the coach's notes, the athlete's and their own — and choose, note by note, what the coach can see.

ATHLETE · 13+

Their own journal

Athletes read the coach's and their parent's notes, write their own, and choose per note whether the coach sees it. Their parent always can.

| Nothing on a child's profile is ever hidden from their parent.

Upload a clip. Get **real feedback.**

How it works

A parent uploads a short clip of their athlete — a vault, a routine, a skill. The AI returns coaching feedback on what it sees: approach, technique, execution. The feedback is saved to the athlete's profile and becomes part of their journey.

Where the lines are

Parents upload; athletes can view. Feedback is always labelled developmental — it is never presented as verified statistics, and it never replaces the coach. Athletes under 13 are not part of this.

We're building a working prototype first, so you can try it on real clips from your own gym and judge the quality before it goes into the product.

WHY IT MATTERS FOR YOUR GYM

Less admin now. Something **worth staying for.**

For the club

Rosters, schedules, messages and payments stop living in five different places. Less of the work nobody sees — and you keep the record of every athlete who has come through your program.

For families

One place to know when practice is, what's owed, and how their athlete is progressing. And a record of ten years of work that doesn't disappear when they move on.

Existing coaches won't have to set anything up again when Phase 3 ships — no re-onboarding, no signing in again.

Every team.
One place.

Free to download on iPhone and Android.
